

## **AEGIS MARINE FLAKES** **TYPE I & II**

**A well-balanced diet to maintain optimum health and vigour**

New Era Aquaculture have harnessed the latest scientific knowledge to create a tailor made technical fish foods and supplements range for coral reef species.

The AEGIS Marine Flakes technical feeding strategy provides all the balanced dietary essentials of our Marine Flakes plus supplementary ingredients that support the fish immune system and keep fish in peak condition.

Supplied as a complete feeding regime AEGIS Marine Flakes TYPE I & II are to be rotated with New Era's Marine Flakes over an eight week period to ensure nutritional variety and maximise palatability.

### **Benefits**

- A simple and effective feeding programme that satisfies nutritional requirements and supports the immune system
- Particularly beneficial to fish undergoing stressful situations

Available in 30g pots and 200g pails

## **AEGIS LIPOSOME SPRAYS**

**Enhances the dietary profile of frozen foods**

Our innovations in lipid technology have enabled the benefits of Aegis dietary advancements to be incorporated into frozen feeding regimes.

The Aegis Liposome Sprays Type I & II are rich in vitamins and antioxidants and use a blend of premium fish oils with natural pigments and nutraceuticals that bind to the tissues of frozen foods to enhance its nutritional profile.

Rotating Marine spray with Aegis Types I & II ensures nutritional variety that will maximise fish health and vigour.

### **Benefits**

- A unique strategy that is a simple and effective addition to habitual feeding programmes

Available in 100ml spray bottle
